

- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence to support the auditor's opinion on the financial statements of the entity's internal control.
- Evaluate the appropriateness of accounting policies and the reasonableness of accounting estimates and disclosures by management.
- Consider whether the appropriateness of management's use of the going concern concept in the financial statements and how that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related risk, in the financial statements or, if such disclosures are incomplete, to modify our opinion. The conclusion is based on the audit evidence obtained up to the date of our auditor's report; however, times events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements present the information clearly and fairly in accordance with applicable law and regulations.

We remain objective with this audit, with professional judgment, among other factors, the planning scope and timing of the audit and significant audit findings, including any significant difficulties in determining that we identify the key audit risk.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be brought to their attention relating to independence, and where applicable, related safeguards.
